To keep the versions in the chronological order, the date when the claims have been filed in the patent office is marked for each version. The status of the main claim Originally filed, Granted or Re-granted (granted after some after grant procedures like opposition or dispute) is marked to recognize the special characteristic of the claim version. The version can be linked to the office action deadline to which the claim version is related to. The complete set of claims can be attached here to have easy access to relevant documentation.

Coming soon: The main claim can be added also via Agent Reporting Interface.
